

KIOSK Mat with USB Connection

The power of control. Automated.

Eliminate unattended unauthorized access to kiosks with the pressure sensitive security USB Mat.

Larco's USB mat operates from a computer via the USB port. The mat sends a series of keystrokes to the computer which allows the mat to identify if a user is at the kiosk.

A second set of keystrokes is sent to the computer when the user steps off the mat. This will automatically log off the user and the session will end.

Features and Benefits

- Hands free computer security
- Programmable log-on and log-off
- Precise sensing method eliminates nuisance detections
- Plug and play USB connection (RS-232 version also available)
- Energy saving feature
- Works with existing security
